## SKILLS

- **Languages:** C, Python
- **Frameworks:** HTML and CSS
- **Tools/Platforms:** MySQL, MongoDB, Rapid Miner, WEKA, Google Colab
- **Soft Skills:** Problem Solving Skills, Team Player, Project Management, Adaptability

## INTERNSHIP

- **Make Skilled** July 2023 - August 2023  
*Full Stack Intern*  
Gained hands-on experience with modern web technologies as HTML, CSS, Python, MongoDB, and GitHub. As part of the internship, developed a *Fake Product Identification* project, integrating full-stack technologies to address real-world challenges while demonstrating strong problem-solving skills  
**Tech stacks used:** HTML, CSS, Python, Postman, MongoDB
- **InternPe** June 2023 - July 2023  
*Web Developer Intern*  
Completed an internship focused on web development, where I learned the basics of HTML and CSS. Built a static E-commerce web application, showcasing front-end development skills and user interface design. Gained foundational experience in structuring and styling web pages for an engaging user experience.  
**Tech stacks used:** HTML, CSS

## PROJECTS

- **Scraping Of Jobs From Job Portals to Identify Market Trends** November 2024  
Created a web scraping pipeline to extract job postings from multiple job portals using BeautifulSoup. Processed and analyzed job descriptions to identify market trends, in-demand skills, and salary insights. Visualized key insights using Matplotlib, Seaborn, Power BI, and Tableau for data-driven decision-making.  
**Tech:** Python, Excel and Power BI
- **Car Parking System:** May 2024  
Developed an application that allows to book slots for parking different vehicles, providing a seamless and efficient parking management experience. Implemented MySQL for storing owner and vehicle details, ensuring easy data retrieval and enhanced security. The application includes key features such as user authentication, slot booking, and database connectivity.  
**Tech:** VB.Net, MySQL
- **Event Attendance App:** April 2024  
Designed a mobile application to record student attendance efficiently. Integrated QR code generation and scanning features to capture attendance quickly and accurately. Implemented functionality to store student details in an exportable Excel file, ensuring easy record management and data accessibility.  
**Tech:** Kotlin, Firebase, SQLite

## CERTIFICATES

- Google Cyber Security (Coursera) March 2024
- Cloud Computing Days (NPTEL) July 2023
- Python for Data Science (IBM) June 2023

## ACHIEVEMENTS

- **Secured 1<sup>st</sup> position in Debate Competition:** November 2024  
Secured 1<sup>st</sup> in the debate competition held at Lovely Professional University.
- **NSS Secretary:** August 2023 - August 2024  
Held position as NSS Secretary in Kristu Jayanti College over 4k+ volunteers.
